DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 53-57, 59, 60-62, 75, 77 and 78 are rejected under 35 U.S.C. 102(b) as being anticipated by Ramsier et al. (US 5,844,400). The reference discloses a supervisory circuit such as a processor 200 monitoring the required voltage of a battery (in this case, different battery requires different voltage) and instructing the voltage converter (not shown but the charger would have the built-in voltage converter) to supply the appropriate voltage to the battery. See column 7, line 60 to column 8, line 10.

Claims 66-68, 70-73 and 75-81 are rejected under 35 U.S.C. 102(e) as being anticipated by Bork et al. (US 6,633,932). The reference discloses a charger having, in addition a USB cable, an electronic circuitry acts as a supervisory circuit to determine

the voltage requirement of the battery and instructs the charger (having converter) to output the appropriate voltage usable to the charge the battery.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 58, 63-65, 69 and 74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramsier et al. (US 5,844,400) or Bork et al. (US 6,633,932). The reference does not specifically disclose all the different types of batteries and/or fuel cells which can be recharged. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have charged any type of storage

devices, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

Any inquiry concerning this communication should be directed to the Examiner at the below-listed number on every Tuesday, Thursday and Saturday.
